Full-Stack Development | Authentication & API Security

- Built full-stack fashion e-commerce marketplace with React, Redux Toolkit, TypeScript, Node.js, Express, and MongoDB
- Implemented per-user localStorage-based cart and wishlist persistence, avoiding cross-account data leakage
- Enforced server-side price and stock validation during checkout to prevent client-side tampering
- Designed debounced product search to reduce redundant API calls and improve responsiveness
- Hardened API security with JWT authentication, rate limiting, CORS configuration, and input sanitization

CENT GRAPHIC Github Repo: https://github.com/VincenttChenn/cent-graphics-client

Full-Stack Development | Authentication & API Security

- Built a fullstack color palette app with React, Vite, Node.js, Express, and MongoDB Atlas, featuring 6 curated color editions and 18 palettes
- Implemented JWT authentication with bcrypt password hashing, allowing users to save palettes to a personal collection
- Designed RESTful API with 6 endpoints covering auth, palette retrieval, and collection management
